

NCECC Injury Prevention MOU Report  
Aero Methow Rescue AED Loaner Program

June 2015

The NCECC Injury Prevention MOU was granted to acquire two (2) Public Access AEDs' to be made available to community groups sponsoring community-centered events in the Methow Valley. This grant includes funds to provide training in CPR AED for individuals designated within the groups as a condition of the loan agreement. As an AHA training site, Aero Methow is able to offer the training and will subsidize a portion of the cost. The AED's are maintained by AMRS.

Most recently the AEDs have been used by the Washington Outfitters & Guide Association during their annual Ride to Rendezvous in May. (See photos attached). There were approximately 150 on this ride ranging in age from 7 to 87 years 'young'. Currently the AEDs are scheduled for use at the annual Rhythm and Blues Festival in July and the Chamber Music Festival in July/August. As we inform and educate nonprofits hosting community events of the availability of the AED units, their interest in CPR/AED training and the having the units on site is increasing. This is also true of individuals we inform through our community First Aid CPR/AED classes. We believe this program will continue to be a valuable asset to the Methow Valley and a tool in educating the community in cardiac and stroke awareness and the importance of early interventions.

Respectfully submitted,  
Theresa Remsberg

These pictures were taken the first night in camp as we announced who our EMT's were at campfire orientation to all the guests. The first picture He was telling the guests we had 2 AED's available one would be in the coffee tent and the other at the registration/wash tent under the flag pole. When we were in transit they would be in the coffee truck or the Claude Miller lead wagon.

If you need a printable picture let me know.

Thanks for all of your help.
