In the North Central Region, all EMS professionals who deliver emergency medical care are state certified, and meet all training requirements.

The statewide system is a comprehensive network of providers including ground and air emergency medical services, hospital and rehabilitation services.

A primary focus and function of our regional council is to support quality EMS training to our regional EMS providers, especially those in our small rural

Cardiac & Stroke Systems of Care:

- ◆ With the establishment and successful demonstration of the Trauma System we continue to identify those health issues that negatively impact our populace and answer that need.
- ◆ **SSHB 2396 regarding Cardiac & Stroke Systems of Care enables EMS personnel to take patients directly to those hospitals that meet care requirements and choose to participate in the system.**
- ◆ Our EMS & Trauma system partners are working to fully implement this unfunded system regionally.

North Central Emergency Care Council

is a private, non-profit corporation established in 1991. We work with the Washington State Department of Health and our regional healthcare partners to ensure the continuation of the Emergency Medical Services and Trauma Care system in our communities.

“To Promote and Support a Comprehensive Emergency Care System”

The long term goals of our non-profit organization are to:

- ◆ Maintain ability to continue our mission and vision in a climate of decreasing funding.
- ◆ Maintain the highest level of quality and integrity of ongoing training in the North Central Region.

These long term goals reflect our Vision of:

“Getting the right patient, to the right hospital in the right amount of time”
