High Blood Pressure Alert

Your fire department took your blood pressure during your medical emergency. **Your blood pressure was very high.**

Date: _____
EMT: _____
Your blood pressure:
Systolic: _____
Diastolic: _____

High blood pressure can lead to life-threatening disease such as heart disease or stroke or kidney failure. There are effective treatments for lowering high blood pressure. You need to discuss this with a doctor.

We recommend that you have your blood pressure checked again as soon as possible. You may be called in a week or two in order to find out how you are doing.
